Earlier PDF in this folder is the GitHub Pages 404 response. This PDF is the file.

Rendered from the committed HTML. Relative links were not followed.

Holdings recounted 4 October 2026

Added beside the earlier totals on this site. Those earlier totals were not deleted. This page does not replace them. A filename is a location, not a finding. Appearance is not a finding.

Counted from the public git tree of wezzo72/Barrandodger and of wezzo72/barrandodger-rebuild. Forks were not added. The 660 preservation pages that also sit inside the main repository are already inside the 2,840 PDFs. They are not counted a second time in the total.

Command

Acknowledge all the updated evidence and the new PDFs, so both sites accurately reflect the increased data set. Do not remove a word already published. The earlier figures stay on the page. The present totals are written beside them.

- wezzo72/Barrandodger files: the 29 September 2026 figure was 562. The 4 October 2026 tree is 5,583.
- PDFs in that repository: the 29 September 2026 figure was 148. The 4 October 2026 tree is 2,840.
- docs/official-drive: the published batch was 48. The folder now holds 95. Forty-eight filenames in that folder were not on the named list; they are linked from the official page.
- The preservation index remains 660 pages. The rebuild backup folder now holds 661 PDF files, because the archive statement PDF was added to the 660 crawled page PDFs.

wezzo72/Barrandodger

WHAT	COUNT	WHERE
All tracked files	5,583	repository
PDF files	2,840	the shelves below
HTML files	1,813	includes the 660 rendered preservation pages and the presentation pages
Text files	758	reports, source texts, link lists
myaidrive-pdfs	910 PDFs	myaidrive-pdfs

WHAT	COUNT	WHERE
Preservation-copy page PDFs	660 PDFs	backup/pdf
gmail-drive-sweep	443 PDFs	gmail-drive-sweep
rendered-pdfs	374 PDFs	rendered-pdfs
docs, of which official-drive is 95	194 PDFs	docs · official-drive
Repository root	110 PDFs	root
site-pdfs	107 PDFs	site-pdfs
imports	30 PDFs	imports
ai-essays	10 PDFs	ai-essays
statements, and tabs	1 PDF and 1 PDF	one in each folder

$910 + 660 + 443 + 374 + 194 + 110 + 107 + 30 + 10 + 1 + 1 = 2,840$.

Preservation copy

The ordered source list is still 660 page addresses. Each of those pages is still saved as rendered HTML, as a page PDF, and as a link file. On the rebuild site the backup folder also holds the archive statement PDF, so that folder contains 661 PDF files. The 660 was not replaced.

What this recount does not change

The 29 September 2026 catalogue figures for wezzo72/Backup, wezzo72/pdf-archive and the primary Releases were not re-counted. They remain on [the finding aid](#). The author's description of approximately 1,765 files as about 85 per cent government correspondence was not recalculated. The Department's figure of about 1,187 Outlook items is a figure in a letter. It is not this repository's file count.
