Hi Shannon and Jessica,

For the record, (you know, because I am crazy), I recorded our conversation this morning - happy days.

When the conspiracy is exposed and I am exonerated, I will be holding all people who are complicit in covering up the truth accountable in civil litigation in my furious defence of human rights abuses.

Please see following a succinct letter, and thanks to Jessica for that extremely poorly concealed apparently camouflaged statement of your acknowledgement of my concerns and interest.

Its as low as shark shit.

FYI:

It says on the NDIS Commissions website (I copied and paste)

[Home](#) / **Workers**

[Listen](#)

Workers

The NDIS Quality and Safeguards Commission is an independent government body that will work to improve the quality and safety of NDIS supports and services, and strengthen the skills and knowledge of workers, providers and participants across Australia.

The NDIS Commission is now operating in all states and territories.

Who is a worker?

Under the NDIS Commission, a worker is anyone who is employed or otherwise engaged to provide NDIS supports and services to people with disability. Workers can be paid or unpaid, and can be people who are self-employed, employees, contractors, consultants, or volunteers.

What the NDIS Commission means for workers

Workers will need to understand and comply with the [NDIS Code of Conduct](#), which outlines the expected behaviour of workers, reportable incident requirements, and any additional competencies required for their role.

These obligations are explained in the Worker Orientation Module '[Quality, Safety and You](#)', a 90-minute interactive online course that is now available to assist NDIS workers to better support people with disability.

In addition, Jessica could not identify one single piece of litigation in the following succinct story, which makes her complete as a legal profession in the vile systemic victimisation that I have found myself the unfortunate victim of.

Henceforth, she will be accountable when the domino's start to fall, and I will pursue her role in a conspiracy to pervert the course of justice which is a 10-14 year jail sentence. thanks for allowing me to sleep with the enemy, but he who laughs last hey?

I sustained a psychological injury at work which was a sane reaction to an insufferable situation.

I have not worked since Jan 22nd.

I thought my income protection would kick in - but they have stated 'stress' is a 'mental illness'

In the months that followed I was under intense financial pressure and was bereft of prosperity.

I have documented many calls and emails to HCF that refuse to acknowledge my claim - and refuse to pay it - indeed they watched as I became homeless - and the case is unresolved before AFCA

The matter is before AFCA - however - I have had cases there that have supposed to reach determination by now.

This I have realised is a systemic and malicious conspiracy to maim and reject me of all finance and prosperity and

This relates back to a systemic and malicious conspiracy to harm and reject me of all finances and prosperity and maliciously ruin me.

This relates back to an incident in 2018 whereby I complained about a GP - I explicitly expressed suicidality and have a list of DSM diagnosis.

I was vulnerable - every chatter about suicide should be taken seriously. I was trying to be brave to seek help.

I innocuously recorded this - because I wanted to check if I were not going insane being gaslighted - because I often talked about killing myself with no reaction

The complaint - and the recording - and in actual fact - a transcript of that recording - - was covered up by many organisations and people and I have become aware that as an exemption under the surveillance act 1999 I can record something in defence of my life or legal litigation hence it is a valid form of evidence

I have only just found out after years of struggling - his lawyer stated that I had maliciously recorded that to extort him to AHPRA (they did not find anything wrong or contest that perspective), I overdosed weeks later on an opioid script he gave me in the same consultation.

I reject that utterly

And even if I did - which I absolutely didn't - how is it possible I see him again and wish him luck after I moved after killing myself then find the recording and bring it up retrospectively - it does not make sense

I was gasped that the powers that be did not in favour of such impenetrable and unequivocal watertight evidence - it was a cover up

Plainly - if he did nothing wrong the GP would have welcomed the recording to exonerate himself but many many agencies organisations and the police and beyond have sided with this perspective gaslighting me, denying me any voice or justice

I refuse to accept in my soul I recorded this for a nefarious and planned reason.

If I did though - he is still responsible for not acting and AHPRA covered for him, as well as onion layer of onion layer of people organisations institutions and authorities to my disbelief circled out and out and out

The onion layer of organisation's institutions and government agencies that covered this up and his the 'recording' essentially silencing me, grew bigger and bigger as I sought an explanation, an apology or conciliation. I felt I was losing my mind

I can prove with calls and with emails that I wanted no harm to come to the GP that I requested and begged for a conciliation.

Indeed, I said I would not even complain to AHPRA if he had no insurance - not that I know how that works either.

So-I protected him but was forced to for an acknowledgement of what I saw was in excusable behaviour, medical malpractice and professional negligence.

I went to many agencies and agencies that investigated agencies - no no avail.

So - desperately being gaslighted by so many, it drove me to a kind of non acknowledged madness - so I published it

I started a campaign for justice - to be heard and acknowledged.

Simply, he has lost his job, I am banned from clinic, my name is blacklisted and tarnished.

All I did was ask for help and in my grief of a beloved friend's suicide, I then tried with the medication he gave me. The suicide note breaks my heart and mentions my family my sexual abuser and the people including the GP I was supposed to be receiving care from

He can't sue me - because I am bereft of anything.

I can't be sued - because - under the law - I have done nothing wrong - this recording is permissible in a court.

Neither can I go to jail. I didn't defame him - I protected him and a conspiracy to pervert the course of justice manifested that now is clear

The second he tries to make litigation on me - the court will ask why - the recording will be heard and the malpractice and my suicide exposed due to the negligence malpractice and writing me off.

So it is a loggheads.

But that is the framing of the purpose of this email:

There is another issue in that my former partner, a millionaire who fleeced the government of 1.2 million dollars, admitted he was present at a murder, guilty on drug charges, torching a car for insurance (a real charmer), used coercive means as a narcissist to ruin me. And he did. He still threatens me so today.

He worked for ASIO - and I have been made aware that this systemic and malicious movement to reject my rights amplify my rejection and assault and deny any prosperity I may receive, is real.

I know this because the police - after receiving a call from family about my threat of harming myself unless someone stood up for me - - such was my distress - and so broad and systemic was the movement for me to kill myself before receiving justice - ended me in the psychiatric ward - where I actually did kill myself.

He is another issue-the doctors thought I was psychotic and denied me medication and dosed me up on drugs. The

release notes however say I am absolutely NOT psychotic NOR delusional - the conspiracy exists; confirming what I already knew.

With my mind altered via malpractice of denying my medication I had been wee on for years when I arrived in hospital - and my lack of agency as a human being and the powers that be that systemically oppressed and victimised me - I sadly kill myself.

I was found unresponsive with no pulse, after bleeding out - and the clinical records in the FOI say it was a 'Fatal' attempt and it is agreed that an illegal contraband was used.

The mental health complaints commissioner got caught out advocating for the hospital and the result of that investigation was nothing because the investigator was actually a lawyer acting as a double agent.

I can prove all this.

It's all hard to comprehend.

Now I have another pressing issue:

HCF will pay me the income assist - if I can get work cover who told me that Commcare are my insurer as a person being paid by the NDIA.

They debate this though - and my application was accepted then rejected.

I have one week until next Thursday to gain legal help to enable me worker compensation.

Or I will continue to be bereft of anything and homeless.

I fear though - that this systemic malicious conspiracy **that I can prove** - will result again, in nothing.

They are waiting for me to die.

I fear from my life and I have resorted to street drugs after my scripts for stimulants were rejected by saltwater clinic in Footscray - refused to give me my ADHD medication.

This is despite an associate professor giving me my last script - (who is above them), a diagnosis, and it took over three months and three days from when I left hospital to see a psychiatrist, after five minutes still victimised me, denied my medication - then I was barred from the service.

Now - they have rejected me.

I am in disbelief.

There is a nation wide conspiracy that wants to see my demise and actively participated and aids and abets my death by my own hand. The story is astonishing.

I have till next Thursday for the Commcare claim for workers compensation.

Please see here:

COMMCARE OFFICIAL: Sensitive

Dear Dr McLean

In response to your email below and your email of 29 June 2021 requesting an additional 30 days to allow you to seek legal support and to provide additional information for your reconsideration request. I have approved your request for extension to 29 July 2021. Please provide all information you would like to be considered by close of business 29 July 2021. We will then commence the reconsideration in relation to the determination of 26 May 2021.

I urgently need representation framed by the very brief outline of injustices that have brutally occurred to me in which was victimised, including a 2.5 year childhood sexual abuse case (I was the victim), in which the lawyers watched as I became suicidal and then told me on the phone it failed without any concrete evidence whatsoever.

That is illegal.

I did not even know it had ever been heard by a magistrate.

Suspicious, I begged the magistrate for an outcome.

They sent me a PDF saying 'you were doomed to fail from the start', which is colourful language and abrupt rejection from a survivor.

Please I need your help

Please do not be one of the institutions that rejects my sincere need for help.

I am only a sentient human and I cannot fight the world.
