

07/11/2022

Dear Salt Water Clinic, Footscray and The Mental Health Tribunal,

Regarding the treatment order that was made by Dr Thinzar under the Mental Health Act, enforced by Victoria Police:

Please see the letter below addressed to my lawyer regarding my situation. The broader view must be acknowledged.

Also to be acknowledged the following points that:

- A. I reject the need for a treatment order.
- B. I offer I am willing to have treatment by a psychiatrist with my private health insurance at HCF – I have a referral letter from a GP and I have an appointment waiting.
- C. I am no risk to myself or anyone else.
- D. The risk to me is further persecution by Dr Thinzar and The Mental Health Act.
- E. I suffered a ‘fatal’ injury inside a hospital I will be incarcerated into,
- F. I have private health insurance with HCF – I can get treatment from a private psychiatrist and I welcome it. This alone utterly removes the need for urgent treatment and a stand alone reason why this order should be revoked.
- G. The cover up about my ‘fatal’ injury in Weribee Mercy Hospital and all staff is abhorrent .
- H. It is far further shameful not one person crossed the floor.

- I. It is an utter deplorable position that an 'apology' by (name) referred to returning a broken used toilet brush in my clean clothes after the tragedy because it is 'not hospital policy' to gift their property.
- J. The damage of my experience under The Mental Health Act cannot be underestimated,
- K. My exploitation as 'unwell' was clearly from Mr Iasonidis on (date) after I attempted to gain access to prosperity for my legal settlement,
- L. It is also clear that I was framed by Mr Ball of Ball and partners and I only became aware of this after I had survived the tragedy and I was trying to recover utterly bereft of support or just compensation,
- M. This damage The Mental health Act ultimately had on my physical health and to my overall life cannot be reversed and has caused permanent long term injury,
- N. Dr Thinzar has acted with a one tracked identification of 'distress' – an allegory of 'mental illness' in her assessment of me and this is within her remit but also within her remit to care for a persons holistic needs and acknowledge them,
- O. The treatment order focuses singularly on any distress to the outright rejection of all other factors including The Mental Health Act itself and her role in making the order,
- P. I refuse to be treated in a place where I was literally murdered – and it was murder which I prove in this document,
- Q. The causation of my 'fatal' injury is proven to be a designed persecution by at least two powerful people as key stakeholders in my destruction and not singularly the result of 'mental illness',

- R. I did a PhD on what is 'mad' and what is 'not mad' clearly outlining my position on psychiatry and I refer all to read it,
- S. Salt Water clinic exist in a difficult position in which they are obligated to act when I am 'distressed' yet they will not acknowledge their own part in my murder or my holistic life in any way,
- T. In 2021 when I was revived from certain death I did not see a psychiatrist for ten months. They then rejected me outright with a letter about an 'impasse' and I was cast out as a patient.
- U. I had been identified as a person of interest to the system and then categorically rejected after it had damaged me and I was too much of an existential risk to it.
- V. At the time I still had no psychiatrist.
- W. A simple budget from when I was released from hospital after the tragedy until present illustrates the incredible impossibility of being well or even having a home with just a pension.
- X. For Salt Water Clinic and Mercy Hospital and Society to allow this intelligently designed poverty to happen with zero intervention is evidence enough that my 'illness' has its causation in capitalism stigma shame and discrimination.
- Y. I prove the multimillions of dollars in detriment in this document. If Dr Thinzar does not revoke the treatment order under the Mental health Act I will be instructing my lawyer to sue her for malpractice.
- Z. Further – I will personally attain her ABN and then identify her to credit reporting agency of Credit Sense as an individual using her professionalism to persecute an individual causing great detriment.

AA.I will then personally administer a \$500,000 cost detriment against her ABN which will go onto ASIC's Government file and be on the register for five years and further affect her ability to get credit.

BB. The same will go for every person who keeps this order in place. It is within my remit and within my rights to action this as it does not cause physical harm just a conceptual harm. In contrast every single person who does not act or react or make a police report regarding the below is absolutely causing me physical harm.

CC.This is because of starvation and of homelessness and of acting intentionally in order to redact my prosperity and further not reporting this report of mine is counter intuitive to justice and supports fascism and ultimately tyranny.

DD.

Dear Marshalls Dent & Wilmoth,

Regarding Rich McLean and The Church of Barran Dodger:

Tomorrow at 9am Victoria police will forcibly remove Barran Dodger from his squat at 2 McCubbin St in Footscray. This because he is unable to pay rent and unable to work.

As a legal firm representing him and his interests including his prosperity, I kindly request immediate action to prevent this happening. Please pay an advance out of the retainer to Hung Ho – landlord. \$1656 before 10am. Pay this amount directly to:

NGA Lai, BSB: 013472, ACC: 201752866.

That is Hung's mothers account where rent is paid to. She has died but we don't ask questions.

The situation is a result of circumstances that are politically motivated and well beyond his control which this letter outlines and proves beyond reasonable doubt.

As a legal firm representing his interests it is within the remit of your care to intervene as a body representing his justice and happiness. To enable his detriment for the amount of \$1646 when as a firm (you are worth) would be unconscionable and further proof that you no not act within the remit of legal principle.

Extreme financial duress has burdened him over a lifetime. He is being denied access to significant amounts of money immediately outstanding. Financial abuse is a form of family violence actioned by Mr Steve Iasonidis who has recently threatened to kill Barran and his beloved dog whilst they were on the run from police who were enforcing a treatment order under the Mental health Act. Mr Iasonidis is barran former fiancé of five years and used to be employed by ASIO and his refusal to pay a settlement for the time together in which Barran was exploited is a symbolic key to this puzzle.

The Office of Prime Minister and Cabinet have sadly supported this violence by refusing an FOI. The refusal of this FOI hides the relationship and enables the continuation of abuse further causing

detriment and barran's torture. It elongates the relief he might have felt from a settlement which is still overdue.

The systemic abuse whether it be from HCC, MHCC, The Police, IBAC, The Ombudsman, ASIO, AGIS, AFCA, AHRC, Comcare, Work Safe, The AAT, individual politicians, powerful lawyers, or even his own family, whether it's intentionally and maliciously served or delivered via omission or via prejudice is as vile as it is cowardly.

This is because it victimises an already vulnerable person well known in the public eye to be paranoid and suffer from delusions and hallucinations. To intentionally reject his prosperity by exploiting this in order to persecute him is utterly Un-Godly.

It has caused much damage and even caused his 'fatal' injury in Feb 2021 in Weribee Mercy hospital. This tragedy which left barran unable to feel his feet or walk like he used to and without full use of his memory and his decision making capabilities. This tragedy was covered up by the same forces that oppressed him such as HCC, MHCC, The Police, IBAC, The Victorian Ombudsman Ben Calder, Weribee Mercy Hospital itself including a bluntly rank apology, and up to every politician.

Further, he is still 'on the run' from authorities who enforce the mental health act in its oppression and desire to isolate and silence him via the act of incarcerating him. This is a thinly veiled persecution which aims to punish him with incarceration and silence him.

His is owed considerable prosperity robbed from him or prevented from reaching him. He is owed conservative terms:

\$500000 – Work Cover

\$75000 – HCF Income Assist

\$100000 – HCF Health Insurance

\$100000 – NAVA Premium insurance

\$500000 – An old payout from a policy in 2008 of a TPD extra units

\$250000 – Suing Weribee Mercy Hospital for being the scene of his fatal injury when they owed a duty of care,

\$500000 – A legal settlement from his former partner Steve Iasonidis,

\$2000000 – A detriment settlement from losing over two million dollars at AFCA

\$1500000 – A detriment settlement of over 1.5 million from losing his income protection and his insurance rights that were denied from Australian super and insurer TAL. This was free kicked to the super company by Liz Lindsberg at AHRC,

Cases of these issues also exist:

EE. Sexually abused as a child,

FF. Violently attacked and hospitalised at The Dancing Dog in Footscray.

GG. Violently attacked inside Weribee Mercy Hospital after being re-traumatised by the mental health team.

HH. Being literally run out of town by Victoria Police who threatened him with incarceration by the mental health act knowing full well it was for a political reason of silencing and oppressing him,

II. His whistleblower status refused at ASIC, APRA, AFSA and The Commonwealth Ombudsman are evidence enough that he is universally exploited and that a general consensus to do him harm exists.

Barran self medicates with street drugs but he did not choose misery though as you may argue. Drug use is not the causation of this situation rather a symptom of poverty and malpractice. It is also a result of the movement of oppression as a causation of so much stress and literal torture.

Even his family reject him for his argumentative nature yet every person in his life has allowed this violence to occur and the situation lends itself to self medicate as a side effect of poverty.

Drugs are also a direct reaction of the deficiencies of Dr David Horgan and all of his health care including his psychiatrists and his treatment team. Dr Horgan praised the drug dexamphetamine for his adult ADHD and his outstanding performance with life in his break through of depression. It was intentionally removed from his care and this choice has led to a dependance when in fact he could have been well all along as he was prior to completing a doctorate and then the doctorate then running his own successful business for two years as an allied health professional. Then he was framed at VOCAT set up to fail y Mr ball and incarcerated by the crisis team as a methodology Steve Iasonidis could enact as punishment for an attempt on his superannuation and for blowing the whistle that he confessed to being present at murders.

Regretful but consensual sex took place in 1994 at the local Police and Fireman's break up celebrations. Barran complains of voices inside his room derogatorily torturing his privacy screaming him he is a 'rapist' and a 'faggot' and 'you raped Debbie' and that: 'you're not schizophrenic!'

Let's be clear; the sex was consensual. To hold this allegation as a caveat preventing a persons prosperity or success over a lifetime is not permissible legally.

It also indicates that the oppressors are clutching at straws with any way in order to silence frame and maim him. These 'voices' were never an issue in the years preceding the latest chapter of his life until the time that he was owed money – and lots of it. That included the relative 'safety' of an ASIO employee as a partner.

This treatment of Barran is actually 'torture' over something never tested in a court. This invaded his personal space his finances his reputation and his very personal communications and his life. Further – if a life of disadvantage wasn't enough to appease the public and the police; it is unconscionable to be burdened with a catastrophic character assassination and be cancelled out of life by the public's judgement after being strung out and quartered by homophobic police in a gay hate crime lasting decades. This is a way that in a provable way intends harm and still intends harm and this is actioned by individuals and systemically by companies and statutory authorities.

Barran means no harm to you.

He never has.

You now have an obligation to help him.

That would be compassionate.

For your reference I have included evidence to support this letter:

Footage of Barran giving the engagement ring to Mr Iasonidis (caputo 2011)

David Horgan expressing praise for dexamphetamine treatment (horgan 2019)

The rejection of Barrans FOI from the Office of prime Minister and Cabinet,

The OAIC stating Barrans FOI was 'voluminous'. (OAIC 2022) before it was rejected by OPMC. (gartman 2022).

Evidence Dr McLean applied for a violence intervention order for Steve Iasonidis and it was refused (FOI/2022/045 2021)

The rejection of his Public Interest Disclosure from ASIC who also accepted an unnecessary bankruptcy. (Bianchi 2022)

The results of the systemic abuse made clear in the 'fatal' injury which occurred inside a hospital and then was covered up,

The UN Human rights charter described a law that underpins Australian society but is not exercised by the Government (UN 2006)

I have also attached his failed VCAT case where he was the survivor of child sexual abuse,

AFCA video Tim Gos rejecting service to Barran where he lost over two million dollars in detriment this is before he was banned. (McLean 2021 `)

AHRC detailing that a 1.5million dollar settlement would be free kicked to the opposing party in what was supposed to be an impartial decision, a phone call with Liz Lindsberg. (McLean 2021 `)

Ball and Partners framed barran and silenced evidence that was to be before court.

The evidence was silenced at HCC, MHCC, The Police, IBAC, AHPRA, NHPOPC, The Victorian Inspectorate and The Ombudsman.

Mr Ball informs the Australian Government on its policy and advises the federal ombudsman where our soon to be utterly destroyed vagrant is a failed whistleblower.
